

Dear Hiring Manager,

I hope you are doing well.

I am writing to express my interest in the **Software Development / Full-Stack Engineer** position at your organization. With **1+ years of hands-on industry experience** in building scalable web applications and a strong foundation in full-stack engineering, I am confident in my ability to contribute effectively to your team.

I have practical experience working with **React, Node.js, Next.js, JavaScript, TypeScript, Spring Boot, MongoDB, Redux, Redis, Docker**, and **E2E testing frameworks**, along with a strong understanding of system design fundamentals. I have contributed to multiple end-to-end projects—developing responsive frontends, optimizing backend services, integrating APIs, improving performance, and ensuring maintainability.

Beyond technical skills, I bring strong **problem-solving abilities**, clean coding practices, and a proactive approach to collaboration. I enjoy working in team-oriented environments where I can contribute ideas, learn from others, and deliver high-quality software that aligns with business needs.

I am excited about the opportunity to bring my full-stack skills and passion for building impactful products to your team. I would welcome the chance to discuss how I can add value to this role or any other opportunities within your organization.
